

COVID-19 testing – Memphis Surgery Center

Memphis Surgery Center no longer requires testing for patients that have completed and are 14 days post their second dose of Moderna/Pfizer vaccine or 14 days post J&J vaccine. A copy of the vaccine card must be provided to MSC prior to surgery.

All non-vaccinated patients are required to have a COVID-19 test performed within five days of their scheduled procedure. Patient testing will be available at 1068 Cresthaven Road, Suite #110, Memphis, TN 38119 on Monday-Fridays 8:00am-4:00pm and closed 12:00-1:00pm for lunch.

Testing will be performed on an appointment-only basis. Please call (901) 866-8561 and schedule your appointment for the day highlighted below. Appointments are conducted in suite # 110 (on the first floor). Also, please plan to self-quarantine after testing until the date of surgery.

We will be asking that patients wear a mask when entering the suite and we will have the waiting room arranged to accommodate social distancing guidelines. We also ask that only the patient to be tested enter the suite unless assistance is required, or patient is a minor. We appreciate your understanding of this change as outside temperatures continue to rise and we try to keep our patients and staff as comfortable as possible during the testing procedures. Thank you for your continued support of Memphis Surgery Center and please let us know how we may assist with any issues you may have by calling (901) 682-1516.

Monday surgery = Thursday _____ test day from 8:00am-4:00pm

Tuesday surgery = Friday _____ test day from 8:00am-4:00pm
